Read the text and then answer the questions

Sunnyville is a small town with full of trees. People are happy here, because it is a peaceful town. There are many shops in the downtown. The teenagers meet at the cafes in the afternoons. They drink something together and chit chat. There is a florist and a bakery on the main road. You can feel the smell of fresh bread on the whole road. There is a fire station next to the police station. The cinema and the art gallery are behind these buildings. All houses have gardens and there are a lot of trees and flowers in these gardens. The town also has got a bank, a post office and a library. Unfortunately, there isn't an amusement park in this lovely town. People go to Boston which is 50 km far away from the town. There is a big amusement park there. The population is not too much here, but summers are more crowded than the other seasons because Sunnyville takes the attention of the tourists with its peaceful atmosphere.

Put a tick to the picture which are mentioned in the text.

C)

D)

1.

Animals are very important and necessary for the _____ of the nature.

Which of the following is suitable for the blank above?

- A) efficient
- B) balance
- C) renewable
- D) temperature

2.

- * Public transportation
- * Recycling bins
- * Renewable energy
- * Aerosol products

Which ones in the list above are useful for the environment?

Paul

Public transportation

Emily

Recycling bins

Sally

Renewable energy

David

Aerosol products

Who gives the wrong answer?

- A) Paul
- B) Emily
- C) Sally
- D) David

3.

What is the most important thing for the environment?

Trees, of course! They are very necessary for people because they produce _____.

Which of the following is true for the blank above?

- A) oxygen
- B) carbon dioxide
- C) helium
- D) nitrogen

4.

OUR SOLAR SYSTEM (Güneş Sistemimiz)

This is our solar system. The Sun is the brightest object in it. It reflects its lights to the planets and the stars. There are eight planets in it. They all orbit around the Sun. There is also Pluto in our solar system but the scientists don't call it a planet anymore since 2006. They call it dwarf planet.

Our planet, the Earth is the third planet from the Sun. It is the only planet that has the living forms on it. It has a satellite called "Moon". It orbits around the Earth and they both orbit around the Sun.

- ▶ As a result of moon's orbiting around the Earth, days occur.
- ▶ As a result of Earth's orbiting around the Sun, seasons occur.

The truths about the Solar System;

- ▶ The gravity of the Sun pulls the planets to itself.
(Güneşteki yerçekimi gezegenleri kendine çeker.)
- ▶ All planets have an ecliptic orbit.
(Tüm gezegenler elips şeklinde bir yörüngeye sahiptir.)
- ▶ The Earth has 1, Mars and Neptune have 2, Uranus has 6, Saturn has 10 and Jupiter has 12 satellites. Mercury and Venus don't have a satellite.
(Dünya 1, Mars ve Neptün 2, Uranüs 6, Satürn 10 ve Jupiter 12 uyduya sahiptir. Merkür ve Venüs'ün uydusu yoktur.)
- ▶ Planets orbit around the Sun from west to east.
(Gezegenler güneşin etrafında batıdan doğuya dönerler.)
- ▶ You weigh less on Mars because the gravity on Mars is less than Earth's.
(Mars'da daha az ağırlık çekersin çünkü Mars'da yer çekimi dünyadakinden daha azdır.)

- ▶ Isaac Newton discovered the gravity in 1687.
(Isaac Newton 1687'de yer çekimini keşfetti.)

Activity 19

The Facts about the Solar System

- ✓ The Solar System consists of eight planets and one sun.
- ✓ There are more than 500 solar systems in the universe.
- ✓ Each planet has its own properties and characteristics.
- ✓ Earth is the only known planet to support life.
- ✓ Jupiter is the biggest planet in the Solar System.
- ✓ The Sun is not a planet, but is considered as a star.

Answer the questions according to the information above

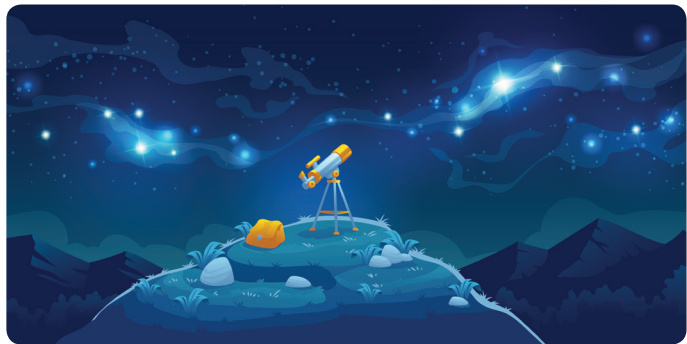

1) Which planet supports life?

2) What is the Sun considered as?

3) What does the Solar System consist of?

4) How many Solar System are there in the universe?

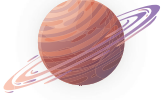

5) Which one is the biggest planet in the Solar System?

Sample Question 5

MARS

SATURN

	Distance to the Sun	Temperature	Dimension	Orbit
MARS	227,900.000 km	-65 °C	6,787 km	687 Earth days
SATURN	1,434,000.000 km	-140 °C	120,500 km	29.5 Earth years

Which of the following is wrong according to the chart above?

- A) Mars is closer to the Sun than Saturn.
- B) Mars has a longer orbit than Saturn.
- C) Mars is cold but Saturn is colder than it.
- D) Saturn is bigger and larger than Mars.

Daha önce comparative (kıyaslama) cümlelerini öğrenmiştik. Orada iki şeyi kıyaslıyorduk. Burada en az üç şey olmak üzere nesnelere içinde en yüksek seviyede olanı belirtiyoruz. Tıpkı comparative cümlelerde olduğu gibi üç aşamada yapıyoruz.

1. Short Adjectives (Kısa sıfatlar)

Tek heceli kısa sıfatlarda;

the + adjective + est + object

long → longest

big → biggest

cold → coldest

short → shortest

hot → hottest

fast → fastest

! Kullanılan sıfatın sonu sessiz + sesli + sessiz şeklinde bitiyorsa son harf çift yazılır ve sonra -est eki eklenir.

Big → biggest

Fat → fattest

Slim → slimmest

Son harfi w, x, y ile biten sıfatlarda bu kural aranmaz.

Slow → slowest

Kullanılan sıfatın sonu -y sesi ile bitiyorsa ve -y'den önceki harf sessizce -y harfi düşer ve -est yerine -iest eklenir.

Busy → busiest

Noisy → noisiest

Happy → happiest

- Saturn is the biggest planet in our solar system.
(Satürn güneş sistemimizdeki en büyük gezegendir.)
- Mercury is the hottest planet in our solar system.
(Merkür güneş sistemimizdeki en sıcak gezegendir.)

2. Long Adjectives (Uzun Sıfatlar)

İki ya da daha fazla heceli uzun sıfatlarda;

the + most + adjective + object

Important ➡ **the most** important

Difficult ➡ **the most** difficult

Interesting ➡ **the most** interesting

Comfortable ➡ **the most** comfortable

- The Sun is the most important object in our solar system.
(Güneş, güneş sistemimizdeki en önemli objedir.)
- This is the most interesting book about the space.
(Bu uzay hakkındaki en ilginç kitap.)
- Telescope is the most useful device for observing the universe.
(Teleskop uzayı gözlemlemek için en faydalı cihazdır.)

3. Irregular Adjectives (Düzensiz Sıfatlar)

Bazı sıfatlar ilk iki kurala uymazlar. Bunlar düzensiz sıfatlardır ve sadece birkaç tanedirler. Diğerlerinden farklı olarak yazılışları tamamen değişir.

Good ➡ the best

Bad ➡ the worst

Far ➡ the furthest / the farthest

Little ➡ the least

Much ➡ the most

- Neptune is the furthest planet from the Sun.

Michael had a science class today. He took some notes during the lesson. The subject was "The Solar System and the Planets". Here are his notes;

1. There were nine planets in the solar system but it is eight now because Pluto is not a planet anymore. We call it a dwarf planet.
2. Venus is the second planet from the Sun but it is hotter than Mercury.
3. Jupiter is a big planet and has a ring around it which is consist of ice particles.
4. Earth's orbit is larger than Mercury and Venus, but smaller than the other planets.

While taking the notes, Michael wrote one of them incorrectly. Which one is the incorrect note?

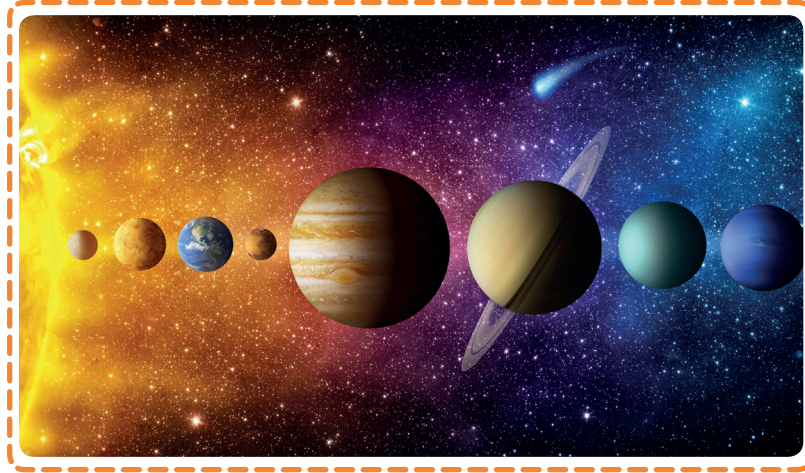

A) 1

B) 2

C) 3

D) 4

Answer

Characteristics of the planets in the Solar system.

MERCURY

It is also known as the swift planet. It is the smallest, hottest and the closest planet to the Sun in the solar system. The temperature on Mercury is 450 °C on normal days but nights are freezing cold. Mercury is the fastest planet in the solar system.

VENUS

Venus is also called as a morning star, is the second closest planet to the Sun in the solar system. Venus completes one complete revolution around Sun in 255 earth days. On bright days, Venus is visible through the naked eye because it is also one of the brightest planets.

EARTH

The third planet in the solar system is the solar system is the only planet in the whole universe which can sustain life. Its nickname is blue planet. It completes one revolution around the Sun in 365 earth days. The presence of water and oxygen is what makes earth sustain life.

MARS

It is also known as the red planet and the fourth planet from the Sun. Mars completes one full revolution around the Sun in 687 earth days. It is most likely to be the next home for human beings after the Earth.

JUPITER

Its nick name is giant planet. It is known the biggest planet. It completes one revolution in 4333 earth days. It has 79 natural satellites revolving around it.

SATURN

It is known as the ringed planet, because of the rings around it. It completes one revolution in 10759 earth days. It has 62 natural satellites composed of ice.

URANUS

It is the second largest planet in the solar system. It completes one revolution in 30687 earth days. It is also the coldest planet in the solar system.

NEPTUNE

The last planet in the line is Neptune also called a big blue planet. It is 2.8 billion miles away from the Sun and takes 60190 earth days to complete one revolution.

Activity 23

Answer the questions according to the text.

1) Which one is the fastest planet in the solar system?

2) What is the nick name of the planet Jupiter?

3) How many days does Uranus complete its orbit?

4) What makes Earth sustain life?

5) Why do we see Venus on bright days?

6) Which planet has the longest orbit in the solar system?

7) On which planet can people live after the Earth?

Activity 24

Write "True" or "False" according to the text.

1) Venus is one of the brightest planets in the solar system.

2) The orbit of Jupiter is 687 earth days.

3) The planet Saturn has rings around it.

4) The big blue planet is the furthest planet from the Sun.

5) Saturn has more satellites than Jupiter.

6) Uranus is almost 3 billion miles away from the Sun.

1.

This planet has got a pale blue colour because there are ice crystals on it.

What is the name of this planet?

 Mickey: We can do many things. For example, we can organise campaigns. We can warn people about the environment.
 Mickey: In fact, it is very easy to help our world. For example, we should recycle products such as plastic, bottles and paper.
 Mickey: Why don't we organise a campaign in our hometown this weekend? We can tell these to people.
 Mickey: Great! Let's start to work then.
